

INTERACTIVE ACTIVITIES

Nature Walk

- Take a nature walk around the school grounds, exploring plants, trees, and small insects.
- Encourage students to observe and collect natural items like leaves or pebbles.
- Discuss the concept of different environments and how living things adapt to them.

Environmental Debate

- Divide into groups and assign each group an environment (beach, mountains, etc).
- Have each group prepare arguments about why their environment is the best for living things.
- Organize a friendly debate where groups present their points of view, encouraging teamwork.

Nature Journaling

- Provide students with journals and take them on a nature walk.
- Encourage them to observe and sketch plants, insects, or birds they encounter.
- Discuss their observations afterward, promoting scientific curiosity and drawing skills.

Map Exploration

- Provide maps of different environments such as beaches, mountains, and forests.
- Allow students to explore the maps and identify key features like water bodies and elevation.
- Engage in discussions about the animals and plants specific to each environment.
